

A to Z at the Zoo - Reptiles and Amphibia

Directions: You may complete this activity two ways - at the San Diego Zoo (probably more fun and definitely more educational) or you may look up the information online or using reference books in a library. If you go to the zoo, bring a couple of pencils and a ruler required to do rubbings for verification (see the last page for details) and **KEEP YOUR TICKET STUB**.

What is today's date?: _____ What time did you start this assignment?: _____
When did you finish? _____ Total time spent on this assignment? _____

Take a look at the table below. You are required to find 26 reptiles or amphibians with common names that begin with each letter of the alphabet. Then you will find their scientific name and some details about the natural history of the animal. Natural history details include its niche (diet and how it obtains food), habitat, geographical territory, identifying characteristics and behavior.
